Get The Edge At Craps (Scoblete Get-The-Edge Guide)

Synopsis

This is the book craps players have been waiting for! For the first time ever, the casino's worst nightmare, the amazing player known as Sharpshooter, reveals his secrets for getting the edge at craps •how to control the dice when you shoot in order to reduce the appearance of certain numbers (the 7!) and increase the appearance of other numbers. If you learn Sharpshooter's methods of dice control or rhythmic rolling, craps becomes not only a beatable game but a money maker for the player!

Book Information

Series: Scoblete Get-The-Edge Guide

Paperback: 225 pages

Publisher: Taylor Trade Publishing (October 31, 2003)

Language: English

ISBN-10: 1566251737

ISBN-13: 978-1566251730

Product Dimensions: 6 x 0.7 x 8.9 inches

Shipping Weight: 1 pounds (View shipping rates and policies)

Average Customer Review: 4.2 out of 5 stars [See all reviews](#) (47 customer reviews)

Best Sellers Rank: #450,770 in Books (See Top 100 in Books) #31 in [Books > Humor & Entertainment > Puzzles & Games > Gambling > Craps](#)

Customer Reviews

On a recent trip to Las Vegas, I stopped by the Gambler's Book Store for a look. The gentleman there asked if he could help me, and when I replied that I was just looking to see what was new out there, he opined that there was really nothing new to be written in gaming for the traditional table games. I would like to think that Sharpshooter's book is something new. Sure, controlled or rhythmic throwing and setting are not new topics. What is new is the integration of all elements and presents to the crap player with an open mind the actual techniques that can be done by anyone willing to put in the time to practice and fully understand and integrate all that is presented. While another reviewer mentions that more in depth presentations have been made by other authors such as Scoblete and others, I doubt if any of them presents it in as systematic and as simple as Sharpshooter does here. There are people that believe that all dice throws are random and nothing we can do can influence that. This book will probably not change your mind. But to those that are open, there are mathematical and logical presentations, as well as rigid mechanics arguments that

would have you think that it can be possible. For those that are open to that, this book will detail exactly how you can learn to do it. As a disclaimer, I have to reveal that I have taken a course taught by Sharpshooter and have seen these things in a casino, as well as had a beginning level of success commensurate to my experience. I will say that the book contains almost everything that was presented in the course materials, with nothing held back. I am a health professional, and my educational background is strongly weighted in the science and mathematical fields.

I read this book cover to cover in the two weeks preceding a trip to Vegas. It has some great information regarding the game of craps and sharpshooting but definitely has some biases on what part of the table to shoot from and dice grips that could have been approached differently. After getting through the book I setup a small practice rig, rolled and recorded hundreds of dice throws attempting to use this method of shooting the dice. I will say that it does have an effect on the end result because I recorded ratios of how often the 7 came up far below the average 1 in 6. A couple of years ago I started to set the dice (now that I know proper sets these were wrong combos) as well as throw them the same way as possible every time. Which lead me to become interested in anything that could be done to expand knowledge in this area, after getting through this book I felt I understood the concept quite a bit more but was still skeptical of it actually working. I signed up for a private class in Vegas and had some personal instruction along many practice rolls on a real craps table. Using the hardway set (described in the book as 4 4 up and 6 6 facing the outside) I rolled a total of 3 craps numbers out of 200 shots with a sevens to roll ratio of around 1:12 (which is extremely high and will most likely average lower over a longer period of time). The thing that surprised me is the drastic decrease of the craps numbers by placing the 6 and the 1 on the outside of the dice (craps numbers are 2, 3 and 12 - taking the 1 and 6 out of the equation makes it very hard to roll a craps number) with that particular set. I was also able to play in an actual casino with 2 other sharpshooters and noticed we were the only ones who made profits for anyone betting with the dice.
