I was gladly surprised to find this investigation work, mainly because though I live in the Dominican Republic never thought we had so much history related to shipwrecks, and secondly because I travel yearly world wide with my 2 sons looking for historic adventures and of course never thought we had them right here, which is about to change of course thanks to this great work. Dr Kordac does a wonderful job organizing his work from a geographical and from a chronological perspective. This adventure starts in the northeast west side of DR going into the description of hundreds of

shipwrecks and the surrounding events that caused them, then going all around the Hispaniola Island, including all shipwreck accounts in it's minor islands. Another great thing about the way the book is written is the redundancy of information of different storms, battles, coral reefs and historic events for each shipwreck, which makes the book a quick and accurate reference on locations, history and shipwrecks, without the need to go back or forward to find a crossed reference. Piracy: The detailed account of events related to piracy, ship battles, hidden treasures, treasure hunters and on going investigations, is fascinating and very well written. I would recommend this book to anyone interested in treasure hunting, recreational diving, traveling and most of all, History. Dr Kordac obviously is a very detailed investigator both under the water and through history. The accounts on pirates such as Cofresi, Morgan and others makes this book a must read. My sons were also fascinated by the reading. One thing that could be improved is the quality of pictures, they are all black and white, which some how disappoints the reader (at least I was), in particular because one would expect to see the beautiful sea bottom, the shores, the treasures in their full splendor, as one reads. Other than that, I consider this a fantastic investigative book.

Well organized with interesting histories.

Excellent
