Customer Reviews

I always assumed that all slot machines were alike--boy, did I have a lot to learn! Gayle Mitchell went to the source--slot machine manufacturers--to learn slot payout ranges and average hit frequencies (how often a slot will pay). She used the data to identify 200 slots with the best percentage payouts. That list of 200 top slots is included in All Slots Made Easier #3, along with reviews of many of the top slots. Readers are also offered a free newsletter and more gambling tips at Mitchell's web site. I feel better prepared for my next casino visit. Can't wait to try out her tips!

After sending this book or should I say "booklet" to my mom for her birthday gift, I was completely embarrassed after my mom sent it back to me to read. There was very little info that people don't already know and the statistic information was complicated to understand and of little use. They rate the slot machines and then discount all that data by mentioning that the manufacturer sets the machines according to each casino. So don't waste your money and definitely don't send as a gift!

This information would be much more useful if it contained information for different denominations. Most of the titles in her top-200 list look like nickel machines, so it's hard to tell if ANY of the

information is applicable to \$1, \$5 or \$25 machines. How about a separate list for high-denomination machines? Or at least let us know which of these are only nickel or quarter machines. This book was a waste of money.

Thanks to Mitchell's latest book, I now know that all slots are not created equal. Before reading "All Slots Made Easier #3," I carefully managed my gambling money, but without paying attention to which slot version I played. Mitchell gives readers, whether seasoned players or amateurs, a straight-forward analysis of hit frequency and payout percentage to help us ENJOY our casino experiences.
