I stumbled across this book while preparing a project as part of my undergrad Psychology studies. What a lucky find this is! *** Many statements exist in the world of mental health practice regarding
what standards of professionalism, ethicality, conduct, and confidentiality a psychologist should
adhere to. Many of them, I’ve discovered so far, are abstract: they state the standard but give little, if
any, illustration on how a practicing therapist applies all that to his/her job and life. This book is the
first I’ve uncovered that gives the clear and understandable picture that I need as an aspiring
psychologist. *** I think I understand well enough the general principle that motivated the authors to
write this book: all too often, each of us has gotten burned in the past because of some rule, some
technicality, some law that would have worked in our favor had we acted with a knowledge of it. For
example, I know someone who wouldn’t have paid a single cent of his medical bills caused by an
on-the-job accident had he simply reported his injury within 48 hours instead of waiting a week.
Things like that. I’m always making sure I do things like keep receipts, review credit card
statements, and watch what creeps into my college transcripts, because it’s the little things that can
screw our lives up so badly. All the more so for therapists, the authors believe, because of their
heavy responsibility to safeguard their clients’ welfare, and because unfortunately their training
doesn’t seem to prepare them for some types of potential legal trouble. *** As part of that approach,
this book takes an interesting departure from other literature on mental health ethics.
