The Animal Dialogues: Uncommon Encounters In The Wild

Synopsis

THE ANIMAL DIALOGUES tells of Craig Childs' own chilling experiences among the grizzlies of the Arctic, sharks off the coast of British Columbia and in the turquoise waters of Central America, jaguars in the bush of northern Mexico, mountain lions, elk, Bighorn Sheep, and others. More than chilling, however, these stories are lyrical, enchanting, and reach beyond what one commonly assumes an "animal story" is or should be. THE ANIMAL DIALOGUES is a book about another world that exists alongside our own, an entire realm of languages and interactions that humans rarely get the chance to witness.

Book Information

Paperback: 352 pages

Publisher: Back Bay Books (March 11, 2009)

Language: English

ISBN-10: 0316066478

ISBN-13: 978-0316066471

Product Dimensions: 5.5 x 1 x 8.2 inches

Shipping Weight: 11.4 ounces (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars [See all reviews](#) (73 customer reviews)

Customer Reviews

Reviewed by Al Olsen Have you ever wondered about the history of the mountain goat in the continental United States? Or why the rancher who is trying to decrease the coyote population on his ranch seems to only get more coyote pups? These two questions and many, many more are explained in this wonderfully written book by author Craig Childs. His usage of the English language is eloquent, to say the least. This is top-quality writing from a sharp observer who describes himself as a naturalist or adventurer. This book is a collection of thirty-seven essays of varying lengths. They are all personal encounters covering topics from mosquitoes to bears. Most of them are reflections written about these animals in the wild, in varying locations like the Sonora Desert in Mexico, or the Yukon River. He also wrote an interesting piece about birds flying into and out of the twin beams where the World Trade Center once stood. One of the most distinctive aspects of his style of writing

is the way that he plays with words and puts them opposite words that are unusual. Here is an example from his essay on the rainbow trout that clearly shows the fun that he has in describing it. "The motions that followed the length of its body caused great momentum. It moved as if it were solid energy prepared to erupt but satisfied with remaining in one place for a short time. It was as if water had taken a concrete a form and speckled itself with lavenders and reds."Some of the more interesting pieces of trivia were cleverly disguised in his essay on porcupines. For instance, a porcupine's digestive system is nearly a third of its body weight. Then he goes on to talk about the quills. There is a greasy layer of fatty acid that coats the quill.
