If you are in the market for a personal, rather than a political, history of Henry VIII, this is the book for you. Even better, and as promised in the title, the book is not just about Henry. You get plenty of information on all six wives, including such tidbits as Katherine Parr’s shoe fetish (she had 47 pairs of shoes made in one year- Imelda Marcos, move over!); the presence of aristocratic “cloth holders"
in Anne Boleyn’s retinue (these ladies would hold cloths in front of Anne’s face at strategic moments, such as when Anne needed to spit!); and Anne of Cleves’s disagreeable body odor (Henry was eager to meet Anne after he saw the wonderful portrait Hans Holbein had done of her. Unfortunately, when Henry saw Anne in person he was greatly disappointed. And, being a very clean and fastidious fellow, he was even more "turned off" when he got "downwind" of Anne.) The book seems a bit choppy in the early stages. The chapters are very brief and you seem to be tossed about from one topic to another- the various castles; how they were decorated; the strategic and logistical difficulties of going "on progress"; the quantities and types of food served to the King and his minions; etc. But, even though there doesn’t seem to be much of a narrative in the early going, the material is fascinating in and of itself. And, after 200 pages or so, the book starts to come together and becomes more of a straightforward biography. If you are looking for more of a political/military biography this is most likely not going to be your cup of tea.

Generally, I’m not a fan of Weir, as she made a number of errors in her "The Six Wives of Henry VIII". At times her research is faulty. Unfortunately, this book also suffers from mistakes: one of the most glaring is not doing her homework on the 16th C. Tower of London. The current site of the scaffold, in front of St. Peter ad Vincula, was a Victorian notion, and Anne Boleyn’s coronation lodgings, where she stayed after her arrest, is not the present Queen’s House (but does include salvaged architectural features). As a historian, she should not fall into the "tourist trap". However, this book reveals a superb grasp of overwhelming amounts of quirky primary source documents; quite the task. Also, it is a perfect adjunct to countless biographies that overlook this type of background material. While not a biography of Henry VIII per se, this book is a fascinating glimpse into the machinations of his court over time. This lion king, fierce, ruthless, gifted and charming, presided over the first truly Renaissance court in England. Ms. Weir combed obscure sources for hitherto unknown insights and has written them into a cohesive social history. Who knew Henry VIII and Anne Boleyn both favoured cherries and strawberries above all other fruit? I had heard Henry VIII was fastidious in his personal hygiene, but here all is described at length: his daily routines, his eating and exercise habits, how he dined and with whom, the monumental progresses, plus his being the centre of an enormous courtly universe. What protocols his courtiers had to observe! And even Henry VIII is not the master of destiny, at least not in the minutiae: he, too, was bound by conventional expectations of kingly behaviour.
